

Zirkonzahn[®]

Human Zirconium Technology

ALL ZIRCONIA

Combined technology made of all-zirconia

Upper jaw – Prettau bridge on 4 ZrO₂- implants and locators (Camlog)

Lower jaw – Prettau bridge on 4 hybrid telescopes (2 thereof on implants) and activatable telescope attachments (TK1)

Both ensure good wear comfort and excellent cleaning properties for the patient.

The layering of ceramic is limited to the gingiva which was also milled out of one piece of ZrO₂, together with the dental structure. The photographs show the basal view of the supports for the telescopes or locator matrices and the homogeneous all-zirconia occlusal support on the gingiva.

Final result of the removable Prettau bridges

Master Technician Alexander Kanotscher, Austria
See www.zahnprofi.at for the complete work sequence.
