

Zirkonzahn[®]

Human Zirconium Technology

ALL ZIRCONIA

Prettau Zirconia

This Prettau Bridge was 2 toned coloured in the pre-sintered stage by using the special Prettau Colour Liquids applied with a metal-free brush.

The premolar abutments diverge severely calling for a primary substructure. The secondary part is fixed to the primary with a screw. The entire construction is made from 100% zirconia. Only the pink tissue part was completed with ICE Ceramic veneering porcelain.

Prettau Zirconia

Georg Walcher, South Tyrol and Dr. Fernando Rojas-Vizcaya, Spain
